## **About the Keio Economic Observatory**

Keio Economic Observatory (KEO) was established in 1959 at Keio University, for the purpose of conducting theoretical and empirical research on economic and industry studies in the context of the existing economic conditions of Japan. The institute consisted of the three sections: Economics, Law and Behavioral Science. The Institute's researchers consist of specialists in various departments at Keio University as well as the Institute's own research staffs.

Keio Economic Observatories principal tasks consist of:

1. To undertake research activities, both of academic and practical natures, which would increase the knowledge about the reality and/or support the enhancement of social science theories
2. To carry out research projects entrusted to the Institute by industrial or governmental groups outside the University
3. Publication of periodical reviews
4. Organizing seminars and conferences on economic, labor and managerial problems
